

VCOR Christmas Bulletin

December 2017

>40,000 PCI CASES!
>530 Regional STEMI cases!
>1200+ Heart Failure Patients!

IMPORTANT DATES TO REMEMBER:

VCOR office closure: Dec 20—Jan 1st 2018

(Any queries during this time please email VCOR@monash.edu and we will respond in the new year)

Welcome to the last VCOR update for 2017. It's been another busy year for VCOR across all our modules.

More than 40,000 PCI cases have been entered since 2013, it is fantastic to know we have 100% of all PCI hospitals in Victoria engaged with VCOR.

Key 2017 highlights include:

- This year we saw 100% data completeness for the 2016 Annual report which was a fantastic effort by all.
- We have commenced an additional follow up on all patients who received a Bioresorbable Vascular Scaffold (BVS) This has added some additional work for the Data Managers and we acknowledge and appreciate the additional time and effort for sites involved.
- The *Early Management of STEMI in Regional Victoria* module has 10 sites contributing data. The VCOR team have been heading on the road and visiting regional sites which has been very productive with more trips planned for 2018.
- We are very pleased to announce that the Heart Failure Snapshot series has collected data relating to more than 1200 Heart Failure patients across 16 hospitals since its pilot in 2014. The Heart failure Snapshot has provided extremely important and useful data.
- It is exciting to announce that the Cardiac Implantable Electronic Devices (CIED) module is completed and will commence early 2018 with 5 public hospitals engaged.

A big Thank you to the very important stakeholders: VCOR Clinicians, Principal Investigators, Hospital Executives, Quality Managers, Cath Lab, CCU, Ward and ED staff who have supported VCOR directly and indirectly.

A big heartfelt thank you to the Data Managers who continue to work tirelessly to ensure the Data is submitted, is accurate and on time.

Thank you to the Victorian Cardiac Clinical Network and the DHHS for their continued support. We look forward to many more collaborations in 2018 and beyond.

Events and Meetings

Steering Committee (SC): 6 Feb 2018

Clinical Quality Committee (CQC): 13 Mar 2018

Data Access, Research & Publications Committee (DRP): 6th March 2018
